

Bytescribe brings you an affordable web-based transcription platform!

WebShuttle, our web-based software-as-a-service (SaaS) platform, allows transcriptionists to effortlessly manage their workflow so receiving files to transcribe and deliver completed work back to their clients has never been so fast and easy.

WebShuttle is all about convenience. Securely accessing the account from any computer with an internet connection, transcriptionists can work from just about anywhere. Organizations of any size can use WebShuttle to manage all aspects of their transcription workflow.

A dictator can dictate from any phone or upload from handheld recorders. Given a unique 4-digit ID, the dictator can use the toll-free number to dictate. Account holders are only billed for the time used. Every paid WebShuttle account includes 5 call-in IDs and 3 secure web logins.
